

Review Electronica 2014 in Munich

For Autronic the Munich fair was an important meeting opportunity bringing together all companies established in the electronic market.

Compared with the fair of 2012 we have noticed that the number of visitors was nearly the same and that our attractive product policy stimulated a lot of interest.

The Electronica is the ideal venue to get a quick and comprehensive overview and to present the latest products to a huge number of specialists like we did for example by presenting our latest products ACR350/C, HPBC60-W/Ks and HPBC20. Click on the pictures for more information.

Especially in the field of power electronics we see the tendency to develop applications to an increasing extent under ecological aspects and to place special emphasis on these aspects, besides lower consumption, miniaturization and enormous function enlargements. Our new products exactly meet these requirements; the railway suitable converters are unique in their power class.

Togheter with the Powergroup of Fortec Elektronik AG we were able to exhibit a wide range of prodcts. Fortec, Emtron and Altrac have presented products by Artesyn, Cosel, Meanwell and other well-known manufacturers.

All converters (distribution and own products) can be directly requested and ordered by all four companies.

Information on the Fair:

73.000 visitors from 80 countries visited 2.737 firms from 50 countries. This was almost identical to the number of visitors in 2010 and 2012.

Sachsenheim, 23.12.2014
