

We have been successful on the market for 40 years now as specialists in the power supply field for heavy-duty applications and for contract manufacturing.

The great number of trains including Autronic converters have been performing reliably over the years and also the latest generations of trains operating with our converters are highly esteemed world-wide. In addition, numerous customers have confidence in our contract manufacturing services.

### **We take pride in these achievements.**

The 40th anniversary of our company was celebrated in a fitting manner: numerous staff members together with former employees enjoyed a wonderful day with a Bavarian brunch to pass in review past times of teamwork.

One of the significant pillars of our success are our long-term staff members like Mr. Fuat Deniz. Since 1973 he has been part of our team and was honored by the General Manager Mrs Sandra Maile for his 40 years with Autronic.
